

NORDIC EDUCATION SCHEDULE
October 2007 - March 2008

Introduction

Building towards a successful future through knowledge and education

It takes more than great software to build a successful future. You and your organisation must fully understand how to make the most of your software's full range of capabilities within your own working environment. That's exactly what the CA Education team are here to help you do.

With our unrivalled knowledge of CA Software and a commitment to fully integrate our education solutions in to your business, we will help you exploit the full potential of your software and translate this in to tangible benefits for your company.

We look forward to working with you in the near future.

Kind Regards
The Nordic CA Education Team

 Transforming IT Management

Transforming IT Management

IT has become essential to driving business growth and creating a competitive advantage. To manage IT to support increasing business demand, you need to integrate, consolidate, and automate IT processes.

Through our Enterprise IT Management (EITM) vision, CA helps you transform IT management. EITM enables you to simplify and unify IT management to maximize the value delivered to your business. We help you by providing solutions to govern, manage and secure IT.

Learning Options

Instructor Led Training

The courses listed in this Education Schedule are classroom training. Classroom training still remains the most popular and effective route for IT training, and has come a long way in recent years. CA Education Instructor Led Training gets you right to the heart of the information you need, providing you with unrivalled access to CA software experts. Whether you choose to learn in our Learning Centres or arrange training on-site you will find the teaching focus on test driving new skills and applying new knowledge to real scenarios.

CA Education courses are also available in the following delivery formats:

Virtual Learning

Learn at anytime and from anywhere you have internet access while maximizing your time and training budget. CA Virtual Learning offers value, convenience and results for those students who are on the road or too busy to attend classroom training at a CA Learning Center. This learning option eliminates travel time and provides the freedom to get back to work faster. Virtual Learning Live enables students to learn from CA Education experts without leaving their office. Virtual Learning On-demand allows students to learn at their own pace and get the specific skills they need to do their job most effectively. And a CA Virtual Learning Lab reinforces what is learned in the classroom so students can quickly apply what they learn back on the job for maximum business results.

E-learning

Our Self Paced Training allows you the flexibility to learn anytime, anywhere. Self Paced Learning can prove invaluable when used either before an Instructor Led course to reinforce new knowledge or as a rich reference resource. CA Education offers a large variety of Self Paced Training for example for AllFusion Erwin Data Modeler, eTrust SiteMinder, Wily Introscope and Clarity.

Customised Training

In addition to our CA standard courses we can also offer customised courses to suit specific client requirements. Working closely with you CA Education instructional experts will consolidate content presented in one or several scheduled courses to create a single course to address your needs.

To find out more about the possibilities, please do not hesitate to call the CA Education team in the respective country of your choice. For contact details please see the back page of this brochure.

How to Book

To make a booking please visit our website or contact your local CA Education team. You can find the contact details at the back page of this brochure.

CA Education Training Credit Units (TCUs)

CA Training Credit units (TCUs) are pre-paid standard units of currency that serve as a convenient "bank" of funds you can redeem for ANY CA Education offering without delay. Prepaying for a quantity of TCUs can give you saving and will ease the registration and administration process when attending CA courses. To purchase TCUs, please contact your local CA Education Team.

Education Needs Assessments (ENA)

CA Education can work closely with you to address productivity challenges and competency gaps.

Tailored assessment of individual training needs – Your individual staff members can complete an electronic survey of their knowledge and understanding of CA technology based on their roles in your organisation. The survey results will demonstrate those areas where the greatest needs exist and plot your staff skill level, either foundation or advanced, along a CA recommended learning path. Contact CA Education or use the following link: www.ca.com/education/ena

Comprehensive assessment of your organisation's competency gaps – CA Education will conduct an analysis of your organisation's training requirements in an onsite meeting. A formal organisation Training Plan will be developed that incorporates an aggregate assessment report on the individual training needs of your staff based on their collective electronic survey results.
