

CA Endeavor® Software Change Manager Rapid Implementation

Implement an Effective Mainframe Software Change Management Solution Which Delivers Rapid Results

Lower risk, reduce development costs, and improve efficiencies by automating the mainframe software development process to provide complete change and configuration management. CA Services has the experience and the proven methodologies to help you implement a solution rapidly to accelerate business results from your software investment.

Supporting Your Business

The CA Endeavor® Software Change Manager Rapid Implementation implements CA Endeavor Software Change Manager in an initial bounded deployment that delivers results quickly.

CA architects and consultants work with you to develop solution design and integration specifications that include implementation and test plans. The specifications are built to extend and enhance your capabilities to automate and manage application development processes and improve quality. Once the design and integration specifications are validated, the CA team verifies installation, configures, tests and documents the products and functions defined.

Delivering Business Value

The CA Endeavor Software Change Manager Rapid Implementation:

- Accelerates time-to-value by providing a bounded deployment that gets you up and running quickly
- Reduces the risk of software deployment mistakes, reduces costs, and improves quality
- Helps you leverage CA Endeavor Software Change Manager to automate and streamline development processes such as source transformation and release management
- Delivers achievable implementation and test plans
- Improves efficiency through application of best practice methodologies
- Speeds deployment and staff learning curves

What You Get

The CA Endeavor Software Change Manager Rapid Implementation provides, for a fixed price:

- Basic foundational capabilities including:
 - Rapid implementation tool executed and initial installation verifications completed and documented for up to two mainframe applications
 - Load of customer inventory and execution of customer test plan
 - Completion of package to migrate Elements through the software development lifecycle

- Project management services including a project management plan, schedule, and reporting
- Analysis of your environment in support of the blueprint design
- Development of a solution specification that contains:
 - Business requirements and goals
 - Key business use cases
 - Solution components and configurations
 - Solution architecture and detailed physical architecture
 - Solution impact, implementation and test plans and success criteria
- Verifies customer installation, configures and tests CA Endevor Software Change Manager in z/OS development and production environments
- Configuration and backup documentation
- Staff mentoring
- The purchase of CA Education that may be applied towards any courses currently available from the catalog or CA Education website

Why CA Services?

By leveraging our proven nine-stage deployment methodology, best practices, and expertise, CA Services can help you implement CA products in a way that speeds time-to-value and lowers project risk. When it comes to deploying CA solutions, no other organization can provide the depth of expertise, breadth of services, and partner network required to help you achieve the efficient IT management that drives business results.

CA Services is part of the Customer Value Network (CVN) which brings together CA Services, Education, Support, Communities and Partners to deliver programs, communications, events and offerings to enable your success.
