- 06END10170: CA Endeavor Software Change Manager: Introduction 100

## WHO SHOULD ATTEND

- System Administrator
- Change Administrator

## Course Overview

Software deployment involves many steps and stages and can be slow and prone to errors when these steps are performed manually. CA Endeavor® Software Change Manager (CA Endeavor SCM) is an integrated set of management tools that can be used to automate, control, and monitor the mainframe software development lifecycle. With the ability to support unique development lifecycles, CA Endeavor SCM provides automated and comprehensive change and configuration management.

In this course, you will examine how CA Endeavor SCM manages the software change process by modifying a processor. By attending this course, you can gain the knowledge and skills needed to help your organization successfully plan and implement CA Endeavor SCM as a software change management tool.

This Web-based course presents a portion of the same material as the 06END20261 Instructor-led course and is one Web-based course in the CA Endeavor® Software Change Manager: Administrators bundle.

## This Course Will Show You How To:

- Create and Maintain Processors

## Course Agenda

### Module: Create and Maintain Processors

- Why would you modify a processor?
- How to modify a processor
- TSO Messages
- Testing a processor
