- 06END10160: CA Endeavor Software Change Manager: Overview 100
- 06END10170: CA Endeavor Software Change Manager: Introduction 100

WHO SHOULD ATTEND

- System Administrator
- Change Administrator

Course Overview

Software deployment involves many steps and stages and can be slow and prone to errors when these steps are performed manually. CA Endeavor® Software Change Manager (CA Endeavor SCM) is an integrated set of management tools that can be used to automate, control, and monitor the mainframe software development lifecycle. With the ability to support unique development lifecycles, CA Endeavor SCM provides automated and comprehensive change and configuration management.

In this course, you will examine how CA Endeavor SCM may be accessed via the Eclipse-based GUI interface. By attending this course, you can gain the knowledge and skills needed to help your organization successfully implement and utilize CA Endeavor SCM.

This Web-based course presents a portion of the same material as the 06END20261 Instructor-led course and is one Web-based course in the CA Endeavor® Software Change Manager: Administrators bundle.

This Course Will Show You How To:

- Describe CA Endeavor Web Services
- Describe the Eclipse-based UI installation
- Compare views and perspectives
- Describe setting preferences

Course Agenda
