

CA Workload Automation CA 7 Edition r11.3 - v12.0: Differences 200

Course Overview

CA Workload Automation CA 7 Edition (CA WA CA 7 Edition) is a highly scalable, fully integrated workload automation solution that can show you what, when and where your workload needs to run. Designed to cultivate an agile and business-centric IT environment, CA WA CA 7 Edition can simplify the complexity of workload automation by coordinating and executing job schedules and event triggers across your enterprise.

This course will review the major changes between release 11.3 and version 12.0. Through this course, you will see what to expect during the upgrade process, key new features, new enhancements to existing features, and many other changes.

After completing this course, you will have a better idea of what is coming, and how you can best prepare for the migration.
