

# OnDemand CA Fast Load™ & CA Fast Unload™ Version 18 for DB2 for z/OS: Core Functions 200

## Course Overview

CA Fast Load for DB2 for z/OS (CA Fast Load) and CA Fast Unload for DB2 for z/OS (CA Fast Unload) are high-speed utilities designed to load and unload large amounts of data with little or no impact on system performance. CA Fast Load and CA Fast Unload provide extensive formatting and data conversion options to make the data available for immediate use by other applications.

This course will enable you to load and unload data within DB2 using CA Fast Load and CA Fast Unload. In addition, you will learn to leverage other CA Technologies tools and functions while loading and unloading data.

---

### PRODUCT RELEASE

- CA Fast Load Version 18
- CA Fast Unload Version 18

---

### COURSE TYPE, LENGTH & CODE

- Web Based Training (WBT)
- Two (2) Hours
- 06DBT20660

---

### PREREQUISITES

- Experience with DB2

---

### WHO SHOULD ATTEND

- Database Administrators
- Performance Analysts
- Application Developers
- System Programmers

---

## What You Will Learn

- Load and unload data within DB2 using CA Fast Load and CA Fast Unload.
- Unload from an image copy.
- Unload from multiple partitions.
- Unload multiple tables in one job.
- Use SQL features to unload and load.
- Leverage other CA Technologies tools and functions while loading and unloading data.

---

## For Managers

Data movement can be a time-consuming process and can seriously affect the availability of data. CA Fast Load and CA Fast Unload will enable your database administrators to quickly load and extract large amounts of data, thereby reducing the amount of time that data is unavailable.

An understanding of the advanced capabilities of CA Fast Load and CA Fast Unload will help your employees to ensure fast and efficient data movement for importing, reporting, and migration purposes.

## Course Agenda

<b>Module 1 – Perform a Basic Unload Within DB2</b>	<b>Module 2 – Perform a Basic Load Within DB2</b>
<ul style="list-style-type: none"><li>▪ Identify the key features and functions of CA Fast Unload</li><li>▪ Build and execute a CA Fast Unload job using the Utility Manager Online Interface</li><li>▪ Build and execute a CA Fast Unload job manually</li><li>▪ Set default CA Fast Unload values using the parameter library</li></ul>	<ul style="list-style-type: none"><li>▪ Identify the key features and functions of CA Fast Load</li><li>▪ Build and execute a CA Fast Load job using the Utility Manager online interface</li><li>▪ Build and execute a CA Fast Load job manually</li><li>▪ Set default CA Fast Load values using the parameter library</li></ul>
<b>Module 3 – Unload and Load Data Using SQL</b>	<b>Module 4 – Unload and Load Data Using Multitasking, Concurrency, and Partition Independence</b>
<ul style="list-style-type: none"><li>▪ Unload data using a WHERE clause</li><li>▪ Unload data using an ORDER BY clause</li><li>▪ Unload tables using the SAMPLE and LIMIT parameters</li><li>▪ Unload data using a WHERE IN clause with multiple predicate options</li><li>▪ Select rows to load using a WHEN clause</li></ul>	<ul style="list-style-type: none"><li>▪ Unload and load multiple partitions using concurrency and multitasking</li><li>▪ Unload and load multiple partitions using partition independence</li></ul>
<b>Module 5 – Describe the Enhanced Unload Features</b>	<b>Module 6 – Describe the Enhanced Load Features</b>
<ul style="list-style-type: none"><li>▪ Unload data from an image copy using CA Fast Unload</li><li>▪ Describe the support for LOB and VBS</li><li>▪ Unload data in multiple output formats</li></ul>	<ul style="list-style-type: none"><li>▪ Load data in multiple formats</li><li>▪ Reorganize files during a load</li><li>▪ Check data integrity during a load</li><li>▪ Make a backup during a load</li><li>▪ Collect statistics after a load</li></ul>
