Course Overview

The CA DB2 Tools Performance Suite is a set of tools that help to increase productivity and speed up the resolution of complex problems. CA Performance tools enable your systems to run more efficiently and reduce development costs. This course is designed to help you understand the rich features and functions of the tools in the CA Performance Suite.

What You Will Learn

- Identify the main features and benefits of each product in DB2 Tools for Performance Management
- Recognize opportunities for using one of the Performance products to improve efficiency and reduce costs
- Recognize opportunities for using multiple products to address a business problem

For Managers

The CA DB2 Tools Performance Suite can enable your Database Administrators and Developers to easily identify resource-hungry applications and lower development costs.

An understanding of the key features and benefit of the tools included in the CA Performance Suite will help your Database Administrators and Developers to choose the right tools that meet their system and business requirements.
