

CA Fast Load and CA Fast Unload for DB2 for z/OS r16: Core Functions 200

PRODUCT RELEASE

CA Fast Load and CA Fast Unload for DB2 for z/OS r16: Core Functions 200

COURSE TYPE, DURATION & COURSE CODE

- Web-based Training
- Ninety (90) Minutes
- Course Code: 06DBT20490

PREREQUISITES

- Experience with DB2

WHO SHOULD ATTEND

- Database Administrators
- Performance Analysts
- Application Developers
- System Programmers

Course Overview

CA Fast Load and CA Fast Unload are high-speed utilities designed to load and unload large amounts of data with little or no impact on system performance. CA Fast Load and CA Fast Unload provide extensive formatting and data conversion options to make the data available for immediate use by other applications.

This course will enable you to load and unload data within DB2 using CA Fast Load and CA Fast Unload. In addition, you will learn to leverage other CA tools and functions while loading and unloading data.

What You Will Learn

- Load and unload data within DB2 using CA Fast Load and CA Fast Unload
- Unload from an image copy
- Unload from multiple partitions
- Unload multiple tables in one job
- Use SQL features to unload and load
- Leverage other CA tools and functions while loading and unloading data

For Managers

Data movement can be a time-consuming process and can seriously impact the availability of data. CA Fast Load and CA Fast Unload will enable your Database Administrators to quickly load and extract large amounts of data, thereby reducing the amount of time that data is unavailable.

An understanding of the advanced capabilities of CA Fast Load and CA Fast Unload will help your employees to ensure fast and efficient data movement for importing, reporting and migration purposes.

Course Agenda

Module 1 - Performing a Basic Unload Within DB2	Module 2 - Performing a Basic Load Within DB2
<ul style="list-style-type: none"> ▪ Use CA Fast Unload to unload data within DB2. ▪ Use the utility online interface. ▪ Build and execute unload jobs. 	<ul style="list-style-type: none"> ▪ Use CA Fast Load to load data to a different table within DB2.
Module 3 - Unload Using SQL	Module 4 - Multi-Tasking, Concurrency, and Partition Independence
<ul style="list-style-type: none"> ▪ Unload data using a “where” clause. ▪ Unload using an “order by” clause. ▪ Unload tables using the “sample” and “limit” parameters. ▪ Unload data using a “where in” clause. ▪ Select rows to load using a “when” clause. 	<ul style="list-style-type: none"> ▪ Unload and load using CA Fast Unload and CA Fast Load from multiple partitions working with concurrency and partition independence.
Module 5 - Enhanced Unload Features	Module 6 - Enhanced Load Features
<ul style="list-style-type: none"> ▪ Unload from an image copy using CA Fast Unload. ▪ Use LOB and VBS Support. ▪ Unload in multiple output formats. 	<ul style="list-style-type: none"> ▪ Load in multiple formats. ▪ Reorg files during load. ▪ Check integrity of data during load. ▪ Make backup as you load. ▪ Collect statistics following a load.

CA Education is the only authorized training source for CA Technologies.

CA Education ensures you get training anywhere, any time and any way you need it.
