What students are saying about CA AutoSys® Workload Automation Education...

“[The Instructor] delivered a well paced, informative 5 day course with great ‘real world’ advice.”

(CA AutoSys® Workload Automation r11: Foundations 200)

“Course material will enable me to better support an implementation plan along with the major areas of decisions and business process”

(CA AutoSys Workload Automation r11: Security Implementation 300)

“The virtual environments are very well done. The course does a good job of presenting information about the product while having enough labs dispersed through to help deter boredom.”

(CA AutoSys Workload Automation r11: Security Implementation 300)

CA EDUCATION VALUE PROPOSITION

CA Education helps customers unify and simplify the management of IT, resulting in:

Improved Productivity

Do more in less time; maximize staff performance

Improved Service Availability

Less downtime; faster application, system and data recovery

Optimized Software

More value and functionality from existing software

Risk Mitigation

Reduce risk; meet company/industry/regulatory compliance requirements

CA Education Overview

CA Education's number-one priority is to help maximize your CA software investment. That is why we work with you to identify your educational needs, provide a range of flexible learning options, and outline an effective plan to meet your goals.

More than 30,000 people are trained annually by CA Education in many different languages from all over the world. Our training methods and tools are designed to help work teams be more productive in less time.

Our commitment to effective training is demonstrated in how we develop and deliver our curriculum. Our instructors average more than 20 years of industry experience, many of which they've devoted to CA products and technologies. Skilled professionals and top-ranked instructors work together to provide award-winning courses that speed up the learning process and deliver measurable results in productivity, service availability, software optimization and reduced costs.

Training Options

CA Education understands the critical impact that training can have on your business performance. Our experienced and certified professionals and education partners deliver a robust and flexible catalog of courses to align training to your CA technology investment.

Classroom Training

Learn from live experts and share best practices with instructors and peers in state-of-the-art CA Education learning centers. The personal, face-to-face interaction with instructors and peers gives students an open forum to ask questions and share rich tips and tricks. This rich learning solution can ensure the highest levels of competency and knowledge transfer. Instructor-led training classroom training is available at:

CA Learning Centers

Get away from your daily work by attending a class at a state-of-the-art CA Learning Center near you. This option provides a dedicated learning environment that eliminates any impact on your production workflow.

- Public Courses: Choose from a list of popular courses offered at CA Learning Centers
- Private Courses: Dedicated classes for often large customers at CA Learning Centers

On-Site

CA Education's on-site, instructor-led training accelerates the learning curve and boosts productivity. Our instructors teach courses that fit within your learning objectives and present the material in one or several scheduled courses on-site at your facility. On-site courses not only save travel time, but in many cases, students can directly apply the outcome of their hands-on exercises to actual tasks for or with their CA technology implementation.

Virtual Learning

CA Virtual Learning provides the same benefits of classroom instruction at your own desk without the time and expense of travel. CA Virtual Learning options include:

- CA VIRTUAL INSTRUCTOR LED TRAINING (VILT) CA Education certified instructors host the course using state-of-the-art tools over the internet. With your web browser you view the courseware material and whiteboard exercises while listening to and engaging with your instructor as well as with your student peers.
- CA VIRTUAL LAB (VL) Sharpen your skills in a fully functional, hands-on practice environment. Labs are available as a part of a Virtual Instructor Led course or purchasable in one business week increments where applicable.

Web-Based Training

CA Education also offers a number of courses that can be completed outside of the classroom. Our Web-Based Training courses are designed to be an effective self study course allowing you to stop and start the training at your convenience, allowing you to learn at your own pace. Coursework can be provided as a download or on a CD-ROM. Simply access the training online from your office or home, saving you travel time and expense.

BLENDED LEARNING

CA Education is dedicated to providing you with flexible learning options with optimal results. We blend instructor-led, virtual, and web-based course offerings to provide you with a complete learning solution that builds your competency with CA software. We leverage skilled professionals to create blended learning paths that incorporate multiple learning options based on a common methodology. This ideal solution speeds the learning process, which translates to improvements in productivity, service availability, software optimization and return on investment.

CA AutoSys® Workload Automation Package Overview

CA Education recognizes the need for organizations to have flexibility in determining the amount, type and composition of their education offerings. To meet this need, we have built several education packages designed to address the majority of small, medium and large scale implementation types within an organization. This approach also creates cost effective education solutions that enable the recommended amount of personnel in an organization to effectively use, administer and implement CA products and solutions.

The CA AutoSys Workload Automation (CA AutoSys WA) education packages create robust training plans by role and serve to combine the recommended number of each path together in order to create a comprehensive level-set of knowledge within the organization. It is also designed to help accelerate our customers overall time to value in the implementation and use of our products and solutions.

Understanding the Different Roles

Role based education has proven to be an effective model for training various levels of an organization. By delineating the levels of education within each role, we strive to ensure that an organization is receiving the appropriate level of training at the right time while still maintaining a cost-effective and efficient approach to imparting knowledge for an organization. The roles definitions are as follows:

User

Persons responsible for using the product on a daily basis. Key responsibilities include using the product features to meet business needs. Other role types in this category include but are not limited to end-user and operator.

Administrator

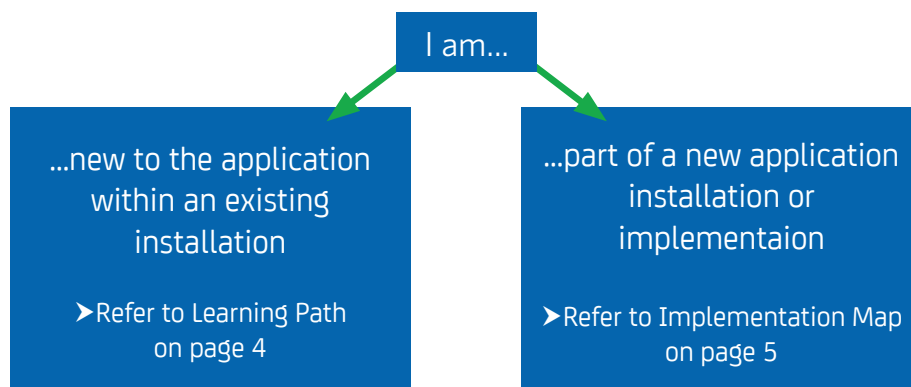

Persons responsible for maintaining the product and providing technical assistance on a daily basis. Key responsibilities include: maintaining and monitoring performance; testing; documenting procedures. Other role types in this category include but are not limited to systems administrator and operations manager.

Implementer/Consultant

Persons responsible for installation and configuration of the product. Key responsibilities include installation; configuration; deployment; troubleshooting. Other role types in this category include but are not limited to architect and engineer.

When Do I Take Training?

Use the graphic below to help explain the best path of recommended training for your situation.

CA AutoSys WA Learning Path

Recommended for New Users to an Existing Installation

The CA AutoSys WA Learning Path below provides a holistic view of the available education by role. These role based paths are then combined into packages in order to provide the recommended depth and breadth of education for organizations of various sizes.

CA AutoSys® Workload Automation r11 Learning Paths

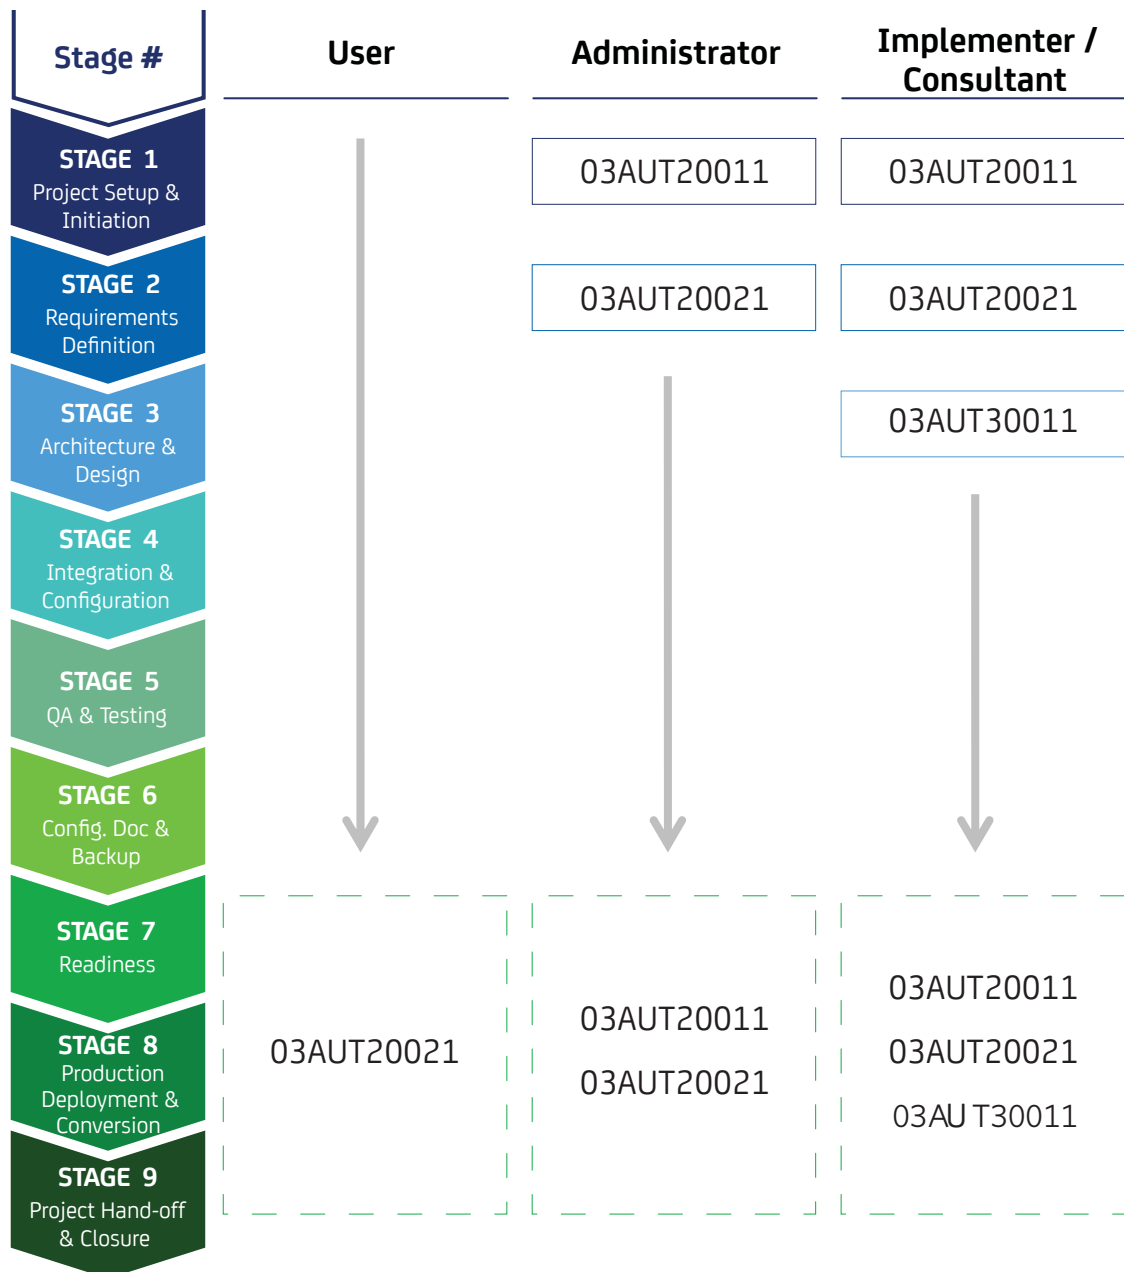

Mapping Training During Implementation

Recommended for those who are part of a New Installation or Roll-out

The diagram below provides a view of the recommended role-based education that maps with the CA Services implementation methodology (nine stages of implementation). These role based paths are then combined into packages in order to provide the recommended depth and breadth of education for organizations of various sizes.

The course numbers listed below correspond with their recommended roles and the ideal stages to complete training. The solid boxes represent the ideal time to complete initial training. Additional training can be taken throughout the implementation cycle. See the recommended additional times for training in the dashed boxes.

Education Packages by Role

The matrix below illustrates the recommended number of individuals per role for organizations of various size and implementation levels. As a result, CA Education believes that an organization will obtain the quickest time to value with its product and solutions purchase by obtaining the appropriate level of education as described below.

Roles	Small Enterprise	Medium Enterprise	Large Enterprise
User	1	2	3
Administrator	1	2	3
Implementer	0	1	2

Instructor Led Training

On-site

Virtual Instructor Led Training

CA AutoSys® Workload Automation r11: Foundations 200

03AUT20021

This course will teach you how to gain the knowledge and skills required to use CA AutoSys Workload Automation to simplify the delivery, availability, and performance of complex cross-platform workloads and schedules across your enterprise. Exercises relating to managing and scheduling jobs and creating and managing calendars will help to enable you to apply this newly acquired knowledge to your environment.

3 Days

CA AutoSys® r11:Installation 200

03AUT20011

Through hands-on exercises, this course will teach you how to confirm prerequisite installation, install CA WCC, and install CA AutoSys. You will also verify installation and perform configuration activities. Finally, you will be taught how to locate, download, and apply patches and service packs in order to maintain optimal operation of your CA AutoSys system.

3 Days

CA AutoSys Workload Automation r11: Security Implementation 300

03AUT30011

Learn essential knowledge necessary to configure CA Embedded Entitlements Manager (CA EEM) with CA AutoSys r11 & CA Workload Control Center (CA WCC). Through understanding the architecture & basic capabilities of the new security component integration, security can be as specific or global as needed, based on your enterprise needs. Learn to secure your environment with native CA AutoSys r11 & CA EEM integrated with CA AutoSys r11 & CA WCC. The course addresses planning security & product specific resource classes, creating users & groups, writing policies, & planning for failover.

2 Days

CA WCC r11: Workload Automation and Reporting 200

03WCC20010

CA Workload Control Center (CA WCC) enables you to visualize and control workload processes and business processes—across multiple platforms—from a business relevance perspective, in a secure and personalized fashion, to reduce costs and improve responsiveness. In this course, you will learn about the CA Workload Control Center (WCC) setup, environment and connectivity to back end servers . You will also schedule jobs, enable Web Services and workflow integration for CA AutoSys® Workload Automation (CA AutoSys WA), perform monitoring functions and report on server statistics and job run activity.

4 Hours

CA AutoSys® Workload Automation r11 Differences 300

03AUT30041

This three-day course will provide schedulers, operators and administrators, and others who are familiar with the architecture, features, and operations of Unicenter AutoSys Job Management r4.5 with an understanding of what has been done to enhance performance, scalability, reliability, and operability in CA AutoSys Workload Automation (CA AutoSys WA) r11 and CA Workload Control Center (CA WCC) r11. This will help you improve the availability of critical IT workload processes and schedules across your enterprise.
