

CA AutoSys® Workload Automation r11 Readiness Service

Build the Foundation for a Successful Upgrade

Prepare for the Future

Upgrading to CA AutoSys® Workload Automation r11 brings improvements in manageability, scalability, security and resource optimization. You want to take advantage of this-but not right now.

Set the stage for your later upgrade with CA AutoSys Workload Automation r11 Readiness Service. Enhance your current CA AutoSys Workload Automation environment and get ready for the future.

<i>Work with CA Services to implement...</i>	<i>So you can...</i>
CA Workload Control Center (CA WCC)	Visualize and control workload and business processes across multiple platforms via a consolidated web-based console
Job Advanced Warning System Workload Service Manager for CA AutoSys Workload Automation (JAWS WSM)	Achieve job stream monitoring, prediction, and historical reporting

Deliver Business Benefits

Leverage the expertise of CA Services to deploy a solution that helps you:

- Reduce costs and improve responsiveness to business priorities
- Meet service level agreements and avoid scheduling delays that can carry regulatory fines
- Create an enhanced solution with less risk and faster time-to-value

Enhance Your Current CA AutoSys Workload Automation Solution

Working to a mutually developed project plan, our team:

- Verifies the in-scope infrastructure
- Installs, configures, and verifies CA WCC and JAWS WMS in a development, test, or production environment
- Conducts knowledge transfer sessions
- Formulates options with respect to upgrading to CA AutoSys Workload Automation r11 at a future time
- Presents a review of the new environment and your anticipated benefits of upgrading
