

CA Role & Compliance Manager Rapid Implementation

Implement an Effective Role and Compliance Management Solution That Delivers Rapid Results

CA Role & Compliance Manager can reduce the cost of role management using pattern-based analytics and a wide range of role discovery techniques, and improve security by automating compliance and certification processes. CA Services has the experience and the proven methodologies needed to help you implement a solution rapidly and with lower risk.

Supporting Your Business

The CA Role & Compliance Manager Rapid Implementation deploys CA Role & Compliance Manager in an initial bounded deployment that delivers results quickly.

CA architects and consultants work with you to develop solution design and integration specifications that include implementation and test plans. The specifications are built to extend and enhance your capabilities in role modeling and management, user, role, and resource entitlement certification, and identity compliance management. Once the design and integration specifications are validated, the CA team installs, configures, tests, and documents the products and functions defined.

Delivering Business Value

The CA Role & Compliance Manager Rapid Implementation:

- Accelerates time-to-value by providing a bounded deployment that gets you up and running quickly
- Reduces the risk of security infrastructure deployment mistakes
- Delivers achievable implementation and test plans
- Improves efficiency through application of best practice methodologies
- Speeds deployment and staff learning curves

What You Get

CA Role & Compliance Manager Rapid Implementation provides, for a fixed-price:

- A foundational “quick start” implementation (privilege quality assessment to identify non-conformities and suspicions related to users, roles, and resources) which encompasses:
 - Importing and preparing (“cleansing”) source data
 - Analyzing data and implied existing relationships among users, resources and roles
 - Pattern-based auditing to identify non-conformities and suspicions
 - Generating and reviewing reports

- To the foundational offering, you can add one or both of the following:
 - A Role Analysis and Modeling engagement
 - An Identity Compliance and Certification engagement covering a user, role or resource certification process
- Project management services including plans, schedules, and ongoing reporting
- Analysis of your environment in support of the blueprint design
- Development of a solution specification that contains business requirements and goals, key business use cases, solution components and configurations, solution architecture and detailed physical architecture, solution impact, implementation and test plans and success criteria
- Installation, configuration and testing of CA Role & Compliance Manager in defined in-scope environments
- Configuration and backup documentation
- Staff mentoring
- The purchase of CA Education that may be applied towards any courses currently available from the catalog or CA Education website

Why CA Services?

By leveraging our proven nine-stage deployment methodology, best practices, and expertise, CA Services can help you implement CA products in a way that speeds time-to-value and lowers project risk. When it comes to deploying CA solutions, no other organization can provide the depth of expertise, breadth of services, and partner network required to help you achieve the efficient IT management that drives business results.

CA Services is part of the Customer Value Network (CVN) which brings together CA Services, Education, Support, Communities and Partners to deliver programs, communications, events and offerings to enable your success.
