

Managing Stimulus Funding for Infrastructure

CA provides management capabilities to help you successfully execute on infrastructure projects that receive stimulus act funding.

The American Recovery and Reinvestment Act of 2009 (ARRA) has targeted \$11 billion in stimulus funds for infrastructure and science projects. These include projects stalled mid-way through the planning cycle as well as “shovel-ready” projects—all unable to move forward without stimulus funds.

Some of these projects are slated to provide capital improvements for the construction of new roads, bridges and buildings as well as sorely needed repairs or upgrades to existing ones. Others are devoted to technology improvements, including the procurement and installation of computer hardware, software and networking systems to modernize your IT infrastructure and deliver more citizen-centric services.

Regardless of the types of projects or agencies involved, one fact is clear: you will need to put processes in place for managing both your infrastructure projects and the grants that fund them. You will also need a way to manage the assets you acquire to meet the expectations of citizens and other stakeholders. CA provides tools that can support your management processes with efficient, cross-functional management and automation.

Managing Infrastructure Projects

Successful execution of infrastructure projects requires you to prioritize projects and tasks, manage resources and assets, and apply best practices to efficiently execute project tasks. CA Clarity Project and Portfolio Manager is the ideal solution to help you manage your stimulus-funded infrastructure projects.

With CA Clarity Project and Portfolio Manager, you can easily allocate human and financial resources across your portfolio of projects, view the status of your project investments, and consolidate financial and project information in a form meaningful to all stakeholders—IT personnel, business analysts and process managers.

Upgrading IT Infrastructure

If you are using stimulus funds to upgrade or expand your agency's IT infrastructure, you will need capabilities for managing these new solutions so they perform efficiently and effectively. CA offers a wide range of IT management solutions:

**For more information:

IT Initiative	CA Solution(s)
Consolidate data centers for greater efficiency and IT resource utilization	Spectrum Automation Manager Solution CA Advanced Systems Management
Upgrade IT infrastructure management to improve service quality, agility and efficiency	CA Spectrum Infrastructure Manager CA eHealth Performance Manager
Manage expanded server and network asset base to increase efficiency and optimize resource usages	CA IT Asset Manager CA CMDB
Expand automation for the mainframes used in your services platforms to leverage new technologies and meet evolving business demands	CA Mainframe 2.0 Solutions

Track Stimulus Funds

Agencies must meet the transparency and reporting demands of the ARRA stimulus bill. CA Clarity Grants Manager On Demand helps you address related compliance requirements, while supporting and managing the end-to-end grants lifecycle: grant selection, acquisition, implementation, and performance tracking. You can leverage CA Clarity Grants Manager On Demand reporting capabilities to transparently share information with all stakeholders. CA Clarity Grants Manager software is available both on-premise and as a Software-as-a-Service (SaaS) option.

Learn more about how CA project, IT infrastructure and grants management solutions can help you manage stimulus projects, contact your CA representative or call 1-866-836-5234.
