To Our Valued Customers:

CA, Inc. today announced the signing of an agreement to acquire 3Tera. With 3Tera—which follows CA’s recent acquisitions of Cassatt, NetQoS and Oblicore—CA is aggressively expanding its portfolio of solutions for providing cloud services and managing cloud computing as an integrated part of an IT management program. These capabilities allow both enterprises and service providers to capitalize more effectively on emerging cloud computing technologies and operating models.

CA and 3Tera share a common vision for the future of cloud computing, and we are excited about the opportunities that this acquisition will create for our customers. We are confident that through existing product synergies and our continued investment in innovation, we will extend our leadership in cloud computing.

The acquisition will also enable 3Tera to leverage the most comprehensive IT management suite in the industry. CA serves 98 percent of Fortune 1000® companies as well as major government entities around the world. 3Tera capabilities will further strengthen CA’s value proposition for these customers, offering streamlined provisioning of applications into private and public cloud environments. Whether you need superior cloud-enablement alone or as part of a broader IT management solution, our combined capabilities will help you achieve your business objectives.

CA is committed to providing the support, training and resources you need to make the most of your 3Tera deployments. We will continue to enhance 3Tera products under CA ownership, and will continue to keep you first in all we do.

Feel free to contact your existing support, services or sales contacts with any questions, or email salesteam@3Tera.com.

This is an exciting time for all of us, and we look forward to communicating more details on our roadmap in the coming months.

Regards,

Barry X Lynn
CEO
3Tera

Chris O’Malley
