

CA SERVICES:

Grants Management for CA Clarity PPM

Grants Management for CA Clarity™ PPM

What it does

Grants Management for CA Clarity™ PPM assists organizations with managing the stages of the grants lifecycle.

With this Web-based solution, teams can research, compare and select from available grants. Grants can then be managed as projects to streamline application processes, manage funding awards and track performance objectives. The solution also provides automated 'roll-up' reporting to help address the American Recovery and Reinvestment Act (ARRA) requirements.

Grant management best practices (for both public and privately funded grants) built into the solution support collaboration across grant stakeholders including stimulus czars, grant reviewers and coordinators, grant developers, program managers and finance officers.

Benefits that deliver value

Grant Management for CA Clarity PPM:

- Helps teams assess available grant opportunities in a structured system with built-in grant management best practices
- Helps develop an overall grants application strategy that is aligned with strategic goals and mission of your organization
- Improves visibility of grants projects across numerous stakeholder groups for greater collaboration and better decision making
- Reduces reporting and compliance effort and potential for errors that can impact grants success

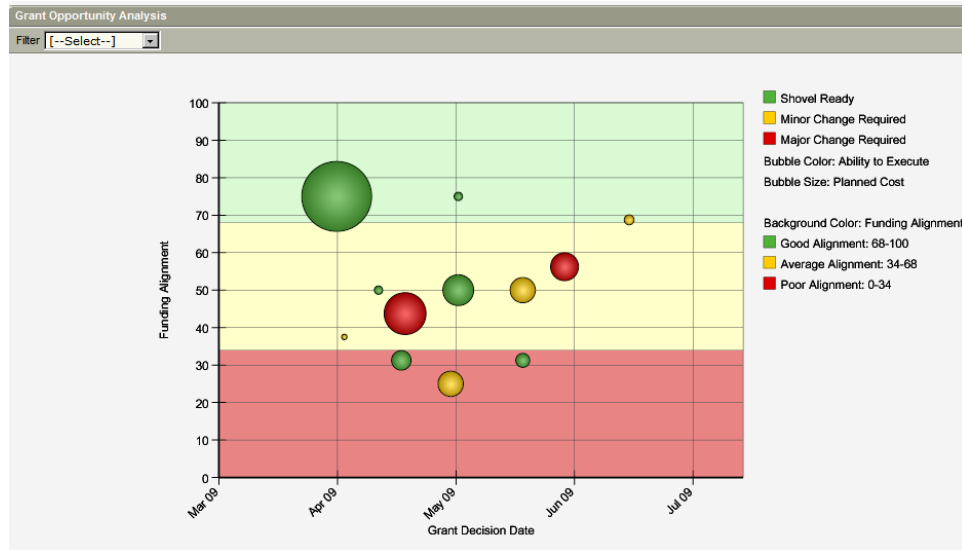

How it works

The solution includes the following technologies:

- Grant Opportunity Center:
 - Provides a central forum for compiling grants information to rank and prioritize opportunities based on assigned values, ability to execute and organizational goals
 - Supports “what if” scenarios to assess impact of attaining different levels of funding, from multiple sources and with a variety of grant types
- Support for Adobe® LiveCycle® Forms ES2: facilitates online application submissions using customizable forms and defined workflows
- Grants Repository: stores resource, task and milestone data mapped to individual grants to help monitor and manage budgets, deliverables and requirements attainment
- Grants Management Dashboards: provide grantees with a view to track performance and financial details such as grant contributions and allocations for one or multiple funding sources or funding rounds
