

Implement an Effective Resource Protection Solution That Delivers Rapid Results

Applying the correct level of security to server-based resources can reduce administrative costs and provide proactive reporting for continuous compliance. CA Services has the experience and the proven methodologies to help you implement a solution rapidly and with lower risk.

Supporting Your Business

The CA Data & Resource Protection Rapid Implementation implements CA Access Control in a bounded deployment that delivers results quickly.

CA Technologies architects and consultants work with you to develop solution design and integration specifications that include implementation and test plans. The specifications are built to extend and enhance your capabilities to define policies, access matrices by user or group, and ensure audit reporting that meets your specific regulatory requirements. Once the design and integration specifications are validated, the CA Services team installs, configures, tests, and documents the products and functions defined.

Delivering Business Value

The CA Data & Resource Protection Rapid Implementation:

- Accelerates time-to-value by providing a bounded deployment that gets you up and running quickly
- Reduces the risk of security infrastructure deployment mistakes
- Helps you leverage CA Access Control for basic access control, administration, and audit log collection
- Delivers achievable implementation and test plans
- Improves efficiency through application of best practice methodologies
- Speeds deployment and staff learning curves

What You Get

The CA Data & Resource Protection Rapid Implementation provides, for a fixed-price:

- Basic foundational capabilities including:
 - Host-based access control
 - Resource access control
 - Advanced policy management (APM)
 - Privileged user password management (PUPM)
 - Unix Authentication Broker (UNAB)
- An option to add a non-federated deployment of CA Enterprise Log Manager (ELM) to collect CA Access Control events (limited to one ELM server and 3,000 events per second).
- Project management services including a project management plan, project schedule, and ongoing project reporting
- Analysis of your environment in support of the blueprint design
- Development of a solution specification that contains:
 - Business requirements and goals
 - Key business use cases
 - Solution components and configurations
 - Solution architecture and detailed physical architecture
 - Solution impact, implementation and test plans and success criteria
- Installation, configuration, and testing of CA Access Control in defined in-scope environments
- Configuration and backup documentation
- Staff mentoring
- The purchase of CA Education that may be applied towards CA Data & Resource Protection courses currently available from the catalog or CA Education website

Why CA Services?

CA Technologies unifies CA Services, Education, and Support to give you the ongoing expert advice, guidance, and assistance you need to successfully plan, deploy, administer and support an integrated CA Technologies solution. No one knows CA Technologies like CA Services and we provide you with precision, confidence, value, results, and flexibility focused around your business needs.

Get Started
