

# CA Enterprise Log Manager Rapid Implementation

Implement an Effective Enterprise Log Management Solution That Delivers Rapid Results

CA Enterprise Log Manager is a high-performance log management solution that helps simplify IT activity compliance reporting and reduce the cost and complexity of proving compliance. CA Services has the experience and the proven methodologies needed to help you implement a solution rapidly and with lower risk.

## Service That Supports Your Business

The CA Enterprise Log Manager Rapid Implementation deploys CA Enterprise Log Manager in an initial bounded deployment that delivers results quickly.

CA security architects and consultants work with you to develop solution design and integration specifications that include phased implementation and test plans. The specifications are built to extend and enhance your capabilities in log collection, audit management and compliance management. Once the design and integration specifications are validated, the CA team installs, configures, tests and documents the product and functions defined.

## Benefits That Deliver Value

CA Enterprise Log Manager Rapid Implementation:

- Accelerates time-to-value by providing a bounded deployment that gets you up and running quickly
- Reduces the risk of security infrastructure deployment mistakes
- Helps you leverage CA Enterprise Log Manager for effective compliance and reporting
- Delivers achievable implementation and test plans
- Improves efficiency through application of best practice methodologies
- Speeds deployment and staff learning curves

## What You Get

For a fixed price, CA Enterprise Log Manager Rapid Implementation provides:

- Basic foundational capabilities that include:
  - › Event collection
  - › Compliance reporting
  - › Policy violation alerts
  - › Log archiving
  - › Out-of-the-box queries and reports

- Project management services, including a project management plan, project schedule and ongoing project reporting
- Analysis of your environment in support of the blueprint design
- Development of a solution specification that contains:
  - › Business requirements and goals
  - › Key business use cases
  - › Solution components and configurations
  - › Solution architecture and detailed physical architecture
  - › Solution impact, implementation and test plans and success criteria
- Installation and configuration of CA Enterprise Log Manager in defined in-scope environments, (unit and QA testing in each)
- Configuration and backup documentation
- Staff mentoring

## Why CA Services?

By leveraging our proven nine-stage methodology, best practices and expertise, CA Services can help you implement CA products in a way that shortens time-to-value and lowers project risk. When it comes to deploying CA solutions, no other organization can provide the depth of expertise, breadth of services and partner network required to help you achieve the efficient IT management that drives business results.
