

SERVICE DESCRIPTION:

CA Healthcheck

CA Healthcheck

Assess, adjust, and improve your CA Technologies solution to increase the effectiveness of your implementation

agility
made possible™

Managing change in your IT environment is difficult. The initial implementation may have met business objectives at the time but most IT environments are constantly changing. A CA Healthcheck assesses the current state of your IT environment to improve performance and effectiveness.

Meeting business requirements

CA Services professionals evaluate your current implementation to identify how well it is meeting your business objectives. A CA Healthcheck delivers recommendations to enhance the value of your investment through process and technology improvements. CA Healthcheck service offerings are available for our entire portfolio of solutions including:

- Mainframe
- Virtualization and Service Automation
- Service Portfolio Management
- Cloud
- Service Assurance
- Security and Compliance

Delivering business value

A CA Healthcheck helps ensure that you continue to receive the highest performance levels from your CA Technologies solutions. A CA Healthcheck is a post-deployment engagement that helps you:

- Improve operational efficiencies and reduce administrative overhead
- Increase throughput and response times for greater system productivity
- Improve system performance to support continued return on investment and business value from the implemented CA Technologies solution
- Align your current CA Technologies solution implementation with current best practices and changes to your organization's business and technical requirements
- Ensure scalability for projected growth and system architecture enhancement needs
- Build a roadmap for upgrades and ensuring your system stays on current releases

What you get

A CA Healthcheck provides:

- A review of original expectations and goals for the implementation versus current state
- Validation for the configuration, use cases, and solution environments
- Recommended strategies and options to extend and enhance your existing implementation
- A documented report prioritizing recommendations for improving your current CA Technologies implementation
- A presentation of findings and recommendations designed to help you maximize the business and technology value of your CA Technologies solution implementation

Why CA Services?

CA Services is committed to your success with CA Technologies solutions. We're here to help you throughout the entire solution lifecycle—from strategy and consulting to implementation and management with unsurpassed depth of expertise and breadth of services offerings to deliver real business results with confidence.

Our approach of unifying CA Services, CA Support and CA Education provides you the ongoing expert advice, guidance and assistance you need to successfully plan, deploy, administer and support an integrated CA Technologies solution. Trust the experts who have the experience gained over 30 years and thousands of successful engagements to deliver successful business outcomes with flexibility, precision and value.

No one knows CA Technologies like CA Services.
