

Rapidly Establish a Foundation for Proactive Asset Management

QUICKLY DEPLOY CA ASSET PORTFOLIO MANAGEMENT TO MANAGE YOUR IT ASSETS THROUGH THEIR LIFECYCLE AND YOUR IT EXPENDITURES THROUGH BUDGETING AND COST ALLOCATION. LEVERAGE THE SKILLS OF CA SERVICES PERSONNEL TO IMPLEMENT A CORE CONFIGURATION THAT HELPS YOU OPTIMIZE IT ASSETS TO BEST SUPPORT YOUR BUSINESS.

Service That Supports Your Business

Implement an out-of-the-box configuration of the Asset Portfolio Management module of CA IT Asset Manager for a single fixed-price. With the CA IT Asset Manager Rapid Implementation, CA Services designs, installs, configures and deploys the software along with Add-on Services Components that enhance the functionality of your solution and promote automation. Your software is installed within the parameters defined in the statement of work so you can quickly start managing spending and hardware and software utilization.

Benefits That Deliver Value

With the CA IT Asset Manager Rapid Implementation you achieve a scalable solution that improves IT asset and resource management, increasing your understanding of their financial impact on your organization. Each engagement helps you:

- Speed data entry cost-effectively with prebuilt components
- Lower implementation risk with best practices
- Decrease staff learning curves with knowledge transfer and the inclusion of CA Education
- See value quickly at a defined cost, while creating a foundation for future growth

What You Get

CA Services delivers your bounded CA IT Asset Manager Rapid Implementation using our nine-stage deployment methodology and strict project governance. We begin the engagement by working with your project managers to establish a project management plan and schedule. Working to this plan, our team:

- Verifies your business and IT objectives and the current IT asset management environment
- Produces a solution requirements document that contains business requirements and expected outcomes, business model and quality attributes
- Reviews current infrastructure, defines the solution architecture, and documents CA Asset Portfolio Management out-of-the-box configurations, IT asset management processes and the data sources to be used with each Add-on Services Component, within set parameters
 - Up to three out-of-the-box roles and contract expiration notifications
 - Up to three Field Labels changes, Audit Flags, and Extended Fields per object
 - Drop down lists and data load requirements

- Produces the solution design document that contains solution and physical architecture models, solution impact, quality attributes, validation approach and solution phasing
- Creates the solution integration instructions and prepares the lab environment
- Installs and configures CA Asset Portfolio Management and Add-on Services Components, performing data loads and hardware reconciliation
- Performs use case and other testing, refining configurations and documenting test results
- Documents solution operational and maintenance procedures with backup and restore
- Conducts two, half-day knowledge transfer sessions for administrative staff and users to review functionality and technical characteristics
- Assists in deployment to production, installing and configuring the software

The CA IT Asset Manager Rapid Implementation also includes the purchase of CA Education for one staff member, which can be applied to CA Asset Portfolio Management courses found on the CA Education website or in the course catalog.

CA Vision

Enterprise IT Management (EITM) is CA's vision to unify IT and simplify the management of today's complex computing environments for greater business results. We do this securely through the intelligent integration and dynamic management of people, processes and technology across the enterprise, including storage, systems, networks, applications, databases and security. In this way, we help you better manage risk, manage costs, improve service and ensure IT resources are consistently used to drive the business.

Why CA Services?

By leveraging our proven 9-stage methodology, best practices, and expertise, CA Services can help you implement CA products in a way that speeds time-to-value and lowers project risk. When it comes to deploying CA solutions, no other organization can provide the depth of expertise, breadth of services, and partner network required to help you achieve the efficient IT management that drives business results.
