

Hosting Services for CA Clarity™ PPM from CA Technologies

Accelerate business value, reduce risk, and lower costs with CA Services

agility
made possible™

With hosting services for CA Clarity™ Project & Portfolio Manager (CA Clarity PPM) from CA Technologies, we can host your licensed CA Technologies solution including initial deployment, maintenance, upgrades and monitoring. Hosting services for CA Clarity PPM will help you reduce your capital outlay, minimize infrastructure risk, speed time-to-market and reduce strain on your IT resources. Your IT organization will be better able to focus on responding to business opportunities, defer hardware expenses and data center upgrades, and focus on driving innovation.

Supporting your business

Hosting Services for CA Clarity PPM from CA Technologies offers deployment, system administration and infrastructure management services for your CA Clarity PPM licenses. Your organization can go live with your solution in a matter of days delivered by our CA Clarity PPM solution experts. Enterprise-class secure and reliable hosting of your PPM solution helps you to achieve an immediate return on your investment and gives you the freedom to focus on what's important to your business.

Hosting Services for CA Clarity PPM are delivered on Verizon Business' flagship cloud computing service, Computing as a Service (CaaS), utilizing SAS 70 Type II compliant processes in a data center with multiple points of redundancy and 24 hours a day, 7 days a week monitoring, and support. CA Services constantly monitors your CA Clarity PPM implementation using CA Technologies industry-leading tools and provides daily backups of your data. Verizon's data centers provide a highly secure physical hosting environment that offers PCI-DSS compliance, flexible network bandwidth, firewall protected system access and SSL-encrypted connections to keep your data safe. The Verizon experts take care of your physical environment, while CA Services Clarity experts handle your PPM solution.
