

CA Secure Web Business Enablement Rapid Implementation

Implement a Secure Web Business Enablement Solution That Delivers Rapid Results

Secure Web business enablement addresses the critical need for automated tools that centrally manage your Web users' access to Web applications, portals and services. CA Services has the experience and the proven methodologies to help you implement a solution rapidly and with lower risk.

Supporting Your Business

CA Secure Web Business Enablement Rapid Implementation implements CA SiteMinder® in an initial bounded deployment that delivers results quickly.

CA architects and consultants work with you to build a high-level architecture and a detailed design that includes implementation and test plans designed to extend and enhance your existing capabilities in Web access administration, user or system authentication, and user password and policy management. Once the architecture and specification are validated, the CA team installs, configures, tests and documents the policies and functions that are defined.

Delivering Business Value

The CA Secure Web Business Enablement Rapid Implementation:

- Accelerates time-to-value by providing a bounded deployment that gets you up and running quickly
- Reduces the risk of security infrastructure deployment mistakes
- Helps you leverage CA SiteMinder for basic authentication, policy and password management, and reporting
- Delivers achievable implementation and test plans
- Improves efficiency through application of best practice methodologies
- Speeds deployment and staff learning curves

What You Get

For a fixed-price, CA Secure Web Business Enablement Rapid Implementation provides:

- Basic foundational capabilities, including:
 - Web access management deployment
 - Single Sign-On across Web applications
 - Centralized policy management
 - A basic authentication scheme
 - Activity and access reporting

- Additional options available:
 - Basic implementation of CA Directory
 - Advanced Certificate Authentication Add-on Services Component
 - User Context Gateway Add-On Services Component
 - Additional test environment configured for high availability
- Project management services, including a project management plan, project schedule and ongoing project reporting
- Analysis of your environment supporting the blueprint design
- Development of a solution specification containing business requirements and goals, business use cases, solution components and configurations, solution and physical architecture, solution impact, implementation, and test plans and success criteria
- Installation and configuration of CA SiteMinder in a development environment, and assistance with transition into production
- Configuration and backup documentation
- Staff mentoring
- The purchase of CA Education that may be applied towards any courses currently available from the catalog or CA Education website

Why CA Services?

By leveraging our proven nine-stage methodology, best practices and expertise, CA Services can help you implement CA products in a way that shortens time-to-value and lowers project risk. When it comes to deploying CA solutions, no other organization can provide the depth of expertise, breadth of services, and partner network required to help you achieve the efficient IT management that drives business results.
