

# CA PA for CA PPM 15.3: Reporting Administration 200

---

## PRODUCT RELEASE

CA PPM 15.3

---

## DURATION AND COURSE CODE

- One (1) Hour
- Course Code: 33CLR25774

---

## PREREQUISITES

- A good working knowledge of the CA PPM 15.x core components, time management, and business administration
- A good working knowledge of ad hoc views, reports, and dashboards
- A basic understanding of SQL
- A working knowledge of how to create CA PPM Studio objects and attributes

## Course Overview

Having the right data is critical for making decisions in a software-driven business environment. Facilitating access to project-related data is a key focus for CA Project & Portfolio Management 15.3 (CA PPM). With the Jaspersoft reporting feature in CA PPM, you can assist your organization in meeting its business reporting goals. This feature provides you with a lightweight, easy-to-use, drag-and-drop, self-service ad hoc reporting capability. This class will give you a solid understanding of the implementation of Jaspersoft for CA PPM, Advanced Reporting access rights, and setup and loading of the data warehouse. In addition, this course will provide you with the practical experience to create custom fields to add to ad hoc views. This training is based on CA PPM classic interface. This training is valid for CA PPM 15.3 and CA PPM 15.4.

---

## What is Covered

- Assign users to appropriate Advanced Reporting access rights and security groups based on their business reporting requirements.
- Describe the jobs and other setup data that support the Advanced Reporting feature.
- Describe concepts of the Data Warehouse and use of the Domain Designer to create custom fields to add to ad hoc views and/or make a copy of a domain.

**INTENDED AUDIENCE**

- Project Manager
- Project Management Office (PMO)
- CA PPM Administrator
