

CA Technologies solutions for IBM Cloud Managed Services on z Systems (zCloud)

Find, classify and protect the personally identifiable information that you manage, and do this all on your mainframe. Reduce your likelihood of a catastrophic data breach.

Learn more: ca.com/dcd

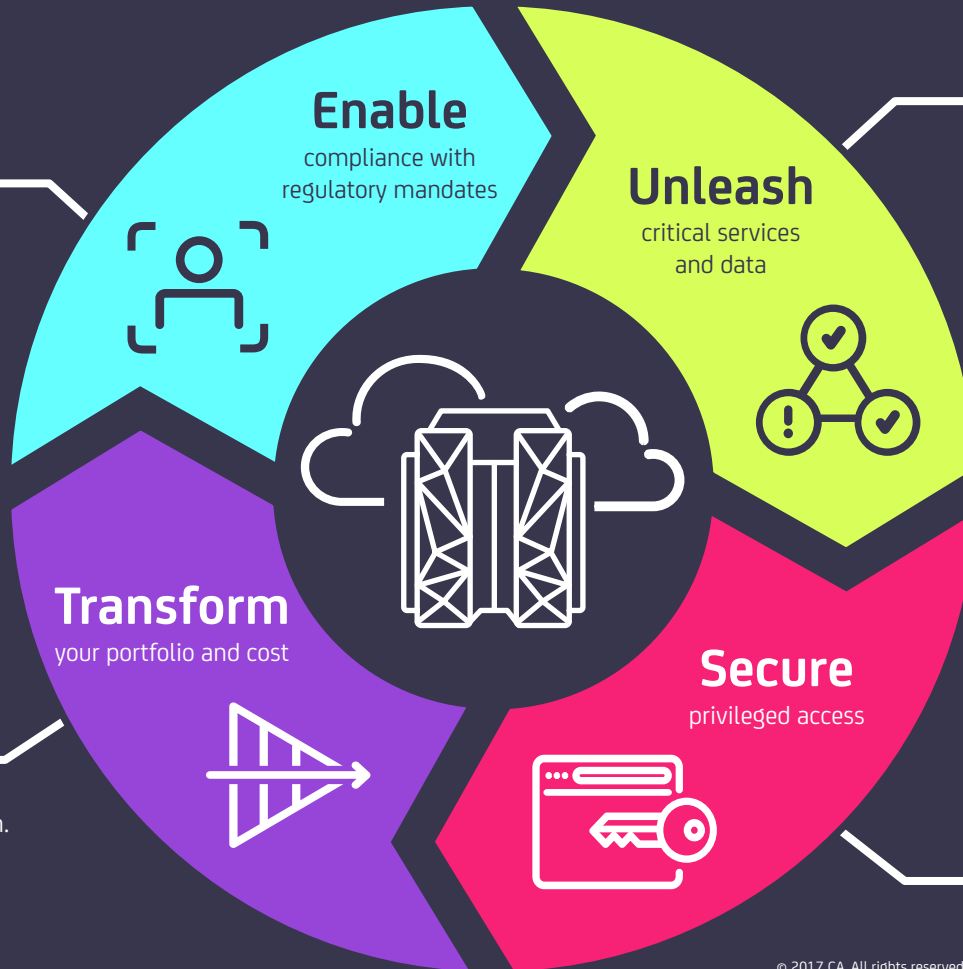

Reduce your software maintenance costs by up to 30%.²

And reduce the complexity of your software portfolio.

Take a short assessment to see if CA and IBM can assist you in reducing costs and driving simplification.

Learn more: ca.com/cscp

70% of the world's mission-critical data is on the mainframe.¹

You need to unleash this data by enabling fast and simple development and test approaches. Accelerate your testing to DevOps and simplify mainframe development by virtualizing key interfaces.

Learn more: ca.com/sv

Know who has accessed what and when. Ensure only approved users access your key zCloud applications and data. Keep a record of session activity for ongoing governance.
