

CA API Management and Security Implementation Services

At a Glance

APIs are the building blocks of the new and open application economy. CA API Management and Security Suite delivers a comprehensive set of solutions that externalize APIs in a secure and reliable manner, enabling you to take advantage of new business models, revenue streams and routes to market. CA API Management and Security Implementation Services help ensure your success as you connect your enterprise to mobile apps, cloud services, partners and the developer community.

Key Outcomes

- **Extend backend services to new front office engagements** for greater business value and customer reach.
- **Securely open data and applications** to partners, mobile apps, IoT, cloud services and developers.
- **Leverage an integrated, broad range of products** for a comprehensive best-in-class solution.

Key Services Features

Reduce risk by leveraging the API professionals with unsurpassed domain expertise.

Empower users and administrators and increase adoption with workshops and training.

Speed time to value and enhance ROI.

Rapidly address the demands of the business and achieve goals of productivity, customer engagement and risk mitigation.

Business Challenges

The application economy is transforming the way you do business. As with any true transformation, there are risks and challenges you need to address. To take advantage of new revenue opportunities and emerging market models, you need to open up valuable enterprise data to mobile apps, cloud services, developer communities and partners via APIs. As a result, you may need to address issues such as:

- **Maintaining security and control of your enterprise data and apps** once they leave the existing boundaries of the internal business
- **Connecting legacy to cloud to mobile environments** in a seamless and user-centric fashion
- **Managing, scaling and monitoring data** as adoption grows and as you open and share enterprise data with developers, Internet of Things (IoT), mobile devices and more

Offering Overview

CA API Management and Security Implementation Services deliver a modular, tailored deployment of CA API Gateway that provides a framework for a comprehensive API management infrastructure. The CA Services professionals employ a solution delivery model that establishes a foundation and then builds upon this foundation with acceleration services that deliver functionality to address your specific deployment's business requirements. CA Services leverages the experience of hundreds of implementations of varying scope and industry best practices to ensure you get the most out of your API infrastructure investment and maximize adoption.

Foundation Services

Foundation Services for CA API Gateway provide for the implementation and configuration of the solution to deliver a solid framework for your API management and security infrastructure. Tasks included in the foundation include project management, requirements gathering and technical and functional design. CA Services professionals install and configure the solution and train your staff on the use of the solution. In addition, CA Services will perform the installation and initial configuration of the OAuth toolkit to help simplify OAuth implementations from existing IAM and Web SSO infrastructures.

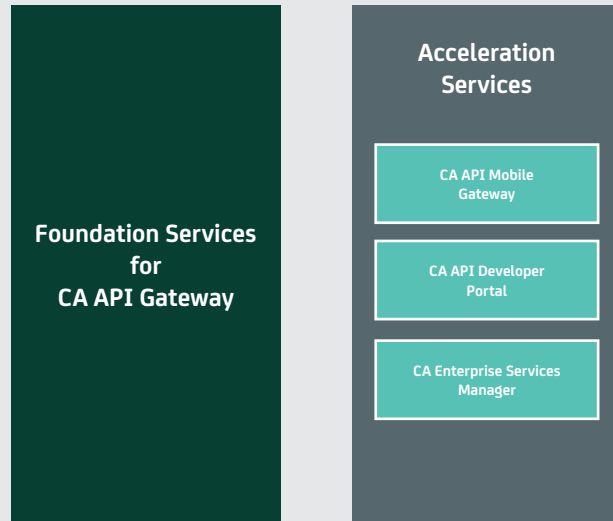

Acceleration Services

Acceleration Services enable you to add capabilities and functionality to extend the value of your solution as your business needs evolve. Each acceleration service is intended to meet specific functional objectives.

- **CA Mobile API Gateway Acceleration Services** implement a SOA management and security infrastructure of the Mobile Access Gateway based on OOTB technology.
- **CA API Developer Portal Acceleration Services** implement an API Developer Portal in support of API publishing, testing, and collaboration based on OOTB CA API Portal.
- **Enterprise Service Manager Acceleration Services** implement operational management, reporting and migration capabilities of the deployed gateways.

CA Services professionals work with you throughout the implementation to help ensure success. Using proven methodologies and industry best practices, our implementation services can provide your organization with a robust and flexible API management and security you can count on now and in the future.
