

# CA DevOps Transformation Subscription

## At A Glance

There is little debate on the enormous value of DevOps, its principles, practices and tooling. Whether you are considering a move to or are fully immersed in a DevOps transformation, your journey is bound to be dynamic. As with other paradigm shifts, success with DevOps can pivot on getting the right, timely assistance from highly skilled experts who bring best practices, insights and credibility from prior engagements.

The CA DevOps Transformation Subscription provides a flexible construct to deliver the expertise and capabilities your organization needs for DevOps success. DevOps experts from CA Services can help in all aspects of your transformation, from instilling knowledge and coaching to leading specific sub-projects or changing management efforts.

### KEY OUTCOMES

- Improved software development and delivery value stream
- More efficient, sustainable, secure DevOps transformation
- Tighter alignment across stakeholders, technologies and processes that span IT domains
- Rapid and measurable results
- Reduced risk of failure

### KEY SERVICES FEATURES

- **Conducted by DevOps professionals** skilled in areas such as agile, Scale Agile Framework (SAFe), LEAN, individual CA solutions and third-party products.
- **Proven best practices methodology** founded on CA in-house expertise and accumulated best practices.
- **Flexible engagement structure** provides access to a wide range of functional roles and technical specialties.
- **Orchestrated for collaboration** to include customer stakeholders for sustaining progress longer term.
- **Security embedded and optimized throughout**, with ready access to scalable best practices.
- **Extensible monthly subscription** provides flexibility that is easy to administer.

## Business Challenges

**Value streams are complex.** Few enterprises have simple software development and delivery value streams. Most are multi-modal, cross-domain and somewhat fragile, meaning a change to a single element can impact other elements, positively or negatively. DevOps transformations require systems thinking, which may be elusive.

**Inconsistent adoption of DevOps practices.** Some teams learn and adopt faster than others. Without help from a trusted, independent expert, self-managing teams can fall behind and slow the progress of the overall transformation. DevOps success requires that all teams accelerate their learning and application of best practices.

**Effectively balancing demands to change, learn and execute.** Transformative initiatives can stall after initial success with first-level best practices. Help from a trusted third party can keep teams focused on continual improvement and experiential learning needed to embrace new mental models, behaviors and activities.

**Toolchain expertise.** DevOps inevitably involves technologies across IT domains from multiple vendors. Critical areas such as security and automation need special attention. If gaps in technical expertise exist, critical momentum for the team can be lost.

**Full value steam agility.** Disconnected agile and DevOps adoption typically results in counterproductive work and duplication that can be avoided by taking an integrated approach to these critical initiatives.

## Offering Overview

The CA DevOps Transformation Subscription provides organizations with a dedicated CA Services team selected for specific areas of expertise. As your organization's needs change during your DevOps transformation, the make-up of this team can be adapted to your needs, while core members remain aligned to your organization to provide continuity.

A variety of competencies and skill sets are available to help deliver DevOps transformation:

- Agile planning
- API management
- Application security
- Continuous improvement
- Continuous integration
- Continuous testing
- Deployment
- Development
- Enterprise agility
- Monitoring
- Operations
- Organizational change
- Privileged access management security
- Performance testing
- Portfolio management
- Release management
- Service virtualization
- Test data management

The CA DevOps Transformation Subscription helps put the right subject matter experts in the right place at the right time. As new challenges and opportunities to improve emerge during your transformation, this flexible engagement structure gives you access to the resources with the skills your organization needs to maintain DevOps momentum and deliver long-term value.

Let consultants from CA Services share the benefit of their industry insights with you and your team and deliver a plan that is integrated in both vision and execution.
