

CA Service Catalog SCIM Connector for CA Identity Manager

What It Does

CA Service Catalog SCIM Connector for CA Identity Manager provides a single point for user administration in CA Service Catalog. The connector allows the administration of Service Catalog Users as follows:

1. Create, Modify, Lookup, and Delete of Service Catalog Users.
2. Maintain Service Catalog Users' Business Unit / Role / Authorization Level associations.
3. Maintain associations to Service Catalog Manager and Delegate Users

Benefits That Deliver Value

CA Service Catalog SCIM Connector for CA Identity Manager provides:

- Centralized Service Catalog user provisioning
- Automated Service Catalog user management
- Secure, Reliable, and Scalable
- Simplicity of support

How It Works

The CA Service Catalog SCIM Connector for CA Identity Manager is a CA Identity Manager Java Connector Server DYN connector. It is built on the capability of CA Identity Manager's SCIM connector and relies on the CA API Gateway with tailored policy assertions to manage CA Service Catalog via its SOAP-based web interface.
