Healthcheck Services for CA API Management

At a Glance

Organizations are accelerating their digital transformations with APIs, and winning with CA's industry-leading API management solutions. Unlocking the true value of your data means being diligent about the health of your critical infrastructure that manages, secures and governs that data. Take advantage of Healthcheck services for CA API Management where CA Services professionals deliver a detailed assessment about the health of your supporting technology, and provide real-world guidance and advice to ensure your organization's long-term API management success.

Key Outcomes

- **Review and advice** to help ensure growth and scalability
- **Greater productivity** with recommendations to increase throughput and reduce response times
- **Optimized system performance** to support continued ROI and business value of your API management solution
- **Alignment of your current CA API Management implementation** with best-practices

Key Services Features

- **Recommend strategies and options** to extend and enhance existing implementation
- **Review of original expectations and goals of the implementation** versus the current state
- **Validation** of the configuration, use cases and solution environments
- **Presentation of findings and documented report** prioritizing recommendations for improving current CA API Management implementation

Business Challenges

You count on CA's industry-leading API management solution to create, manage and secure data and apps being shared by customers, partners, cloud services and others to support your digital transformation and new routes to market. Given the dynamic nature of IT and the constantly changing demands and environment, it makes sense to re-evaluate critical API management assets and systems. Since the original deployment of your APIM solution, you need to ask questions such as:

Is our current CA APIM implementation meeting technical requirements that support the business at scale and delighting our customers?

Are the right procedures in place to ensure we're minimizing risk and maintaining levels of stability needed to meet our business goals?
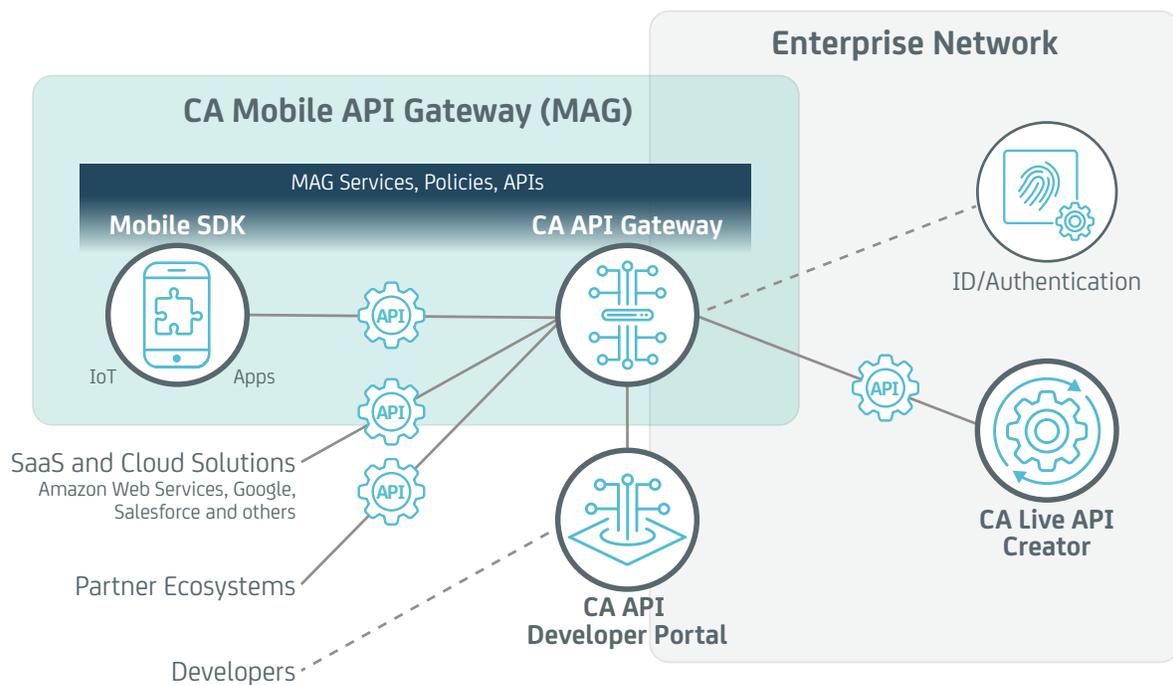

Are we doing everything we can to ensure security and integrity of customer and partner data while maintaining a secure API management framework?

Offering Overview

Healthcheck services for CA API Management provide a diagnostic engagement to gauge the overall technical and operational health of your deployed solution. The service can be an important step in the long-term success of your API management program and provides you with valuable insight into the operations, capacity and vitality of your API management solution. Healthcheck services for CA API Management can include one or more of the following:

- Technical architecture review to review any challenges and map your API management solution roadmap to current and future architecture
- Configuration and operations review to ensure operational stability, monitoring and other important parameters
- CA API Gateway PCI/DSS review to ensure security policy is maintained, cardholder data is protected and a strong vulnerability management program is in place
- Policy review to examine folder structure and review policy debugging and logic
- Performance review to assess past performance issues and measure current performance against a baseline
