Built to Change Summit

#BuiltToChange17 #nobarriers

The Built to Change Summit brings together a small group of the world's most influential media and industry analysts from key publications and firms, to hear from, and engage with CA executive team members, product development leadership and CA showcase customers and partners who are changing their industries.

The experience provides insight and deep exposure to the "new" CA – a modern software factory navigating and helping customers address key industry trends, including guidance for a blueprint that accelerates transformation.

9:35 – 9:50 AM PST

Welcome and Opening

Ayman Sayed
Otto Berkes

10:00 AM – 12:05 PM PST

Showcase 1: Next-gen Dev Practices, Tools and Technologies

Angela Tucci,
Paul Pedrazzi,
Scott Morrison,
Joe Farrell, CEO, BiTE Interactive

Today's agile business is built on a modern application architecture with Microservices and APIs. See why speed equals quality – via a secure collaboration app built, in just weeks, by one of the industry's top mobile shops. And see how backend Microservice and APIs can be created and published in minutes, ready for a mobile developer hand-off to add the finishing touches for a 5-star app

Showcase 2: Apps that Build and Fix Themselves

Jeff Scheaffer,
Margaret Lee,
Sushil Kumar,
Aruna Ravichandran
John Hashimoto, VP Digital, CNN

See zero-touch workflow from planning to production in action! CA Continuous Delivery Director is a powerful, toolchain-agnostic solution that enables organizations of any size, complexity, and budget to eliminate spreadsheets, automate test processes and continually improve continuous delivery.

Showcase 3: Back to the Future With Automation and Machine Learning

Todd DeLaughter
Ashok Reddy

Delivering a superior customer experience at scale is critical not only to a company's growth but to its survival. To meet this challenge and ensure operational excellence, organizations are increasingly turning to predictive operations and intelligent automation. See how CA's innovations in machine learning and automation are meeting these customer challenges today and are enabling the hyperscale architectures of tomorrow.

Showcase 4: CA Accelerator and The Future of Analytics

Otto Berkes,
Joav Bally
Larry Aidem, President & CEO, Fandor

Using holographic technology, navigate through a virtual 3D data center to discover and solve problems in near real time using CA's advanced analytics engine.

Showcase 5: Modernizing Security: The Users and The Apps

Mo Rosen
Sam King

See how CA uniquely delivers a complete, cloud-based identity lifecycle solution integrated with privileged access management and application security testing to reduce security code defects and risks.

12:10 – 12:20 PM PST

Closing/Wrap Up
