

# CA Identity Suite 14.1: New Features 200

## Course Overview

The CA Identity Suite provides comprehensive identity management and governance capabilities with a simple, intuitive user experience. This user experience can dramatically simplify processes such as user access requests and access certifications, resulting in improved productivity and user satisfaction. While providing these business and governance-centric capabilities for business users, the CA Identity Suite also delivers core enterprise-grade identity management and governance capabilities for your IT organization.

In this course, you will identify the new features and enhancements in CA Identity Suite 14.1. This release includes over 30 different new features, enhancements and new platform certifications, as well as several important engineering improvements. Existing CA Identity Suite customers should strongly consider updating their deployment for the many benefits that this new release can provide.
