

# CA Identity Suite 14.x: CA Identity Portal - Manage Certification Campaigns 200

---

## PRODUCT RELEASE

CA Identity Suite 14.0

## Course Overview

As the keepers of the keys, IT organizations have traditionally chosen identity management solutions that make their jobs easier—without giving much consideration to their impact on business users. But, by delivering an inconvenient and inefficient user experience, IT could be hindering business productivity and growth. The ideal solution creates a bridge between IT and the business, creating a convenient, intuitive “one-stop shop” for business users to obtain services and information from the identity management system. The CA Identity Suite bridges this gap by providing an easy to use self-service console, known as CA Identity Portal, which can improve business user productivity by delivering identity and entitlement data in a common business language, as well as a shopping cart experience for requesting access to new systems.

In this course, you will implement and manage entitlement certification in CA Identity Portal. By completing this course, you will be able to implement an intuitive, business-oriented user experience that dramatically simplifies the process of certifying user entitlements.

---

## COURSE TYPE, LENGTH & CODE

- Web Based Training (WBT)  
Half (0.5) Hour
- Course Code: 04IMG20380

---

## What You Will Learn

- Implement a simplified access certification process for business users.
