

CA Identity Suite 14.x: CA Identity Manager - Implement Provisioning 200

Course Overview

This course aims to provide you with a functional understanding of provisioning in CA Identity Manager. You will discover how to create provisioning roles and account templates, which will enable you to give users access to business applications that run on managed endpoints. In addition, through user and account synchronization tasks, you will also manage accounts so they comply with the provisioning role assigned to a user and ensure an account has the same capabilities specified by its account template.

PRODUCT RELEASE

CA Identity Suite 14.0
