

CA Identity Suite 14.x: CA Identity Manager – Feeder Methods, Policy Xpress, and Reporting 200

PRODUCT RELEASE

CA Identity Suite 14.0

Course Overview

This course aims to provide you with a functional understanding of feeder methods, Policy Xpress policies, and reporting in CA Identity Suite. You will discover how the different feeder functions enable you to quickly import large numbers of users and objects into CA Identity Manager. Uncover the powerful capabilities of Policy Xpress that help you create complex business logic without the need to develop custom code. And by generating CA Identity Manager reports from management data, you can analyze the relationship between objects in your CA Identity Manager environment and view the system status at a certain point or system activity over a time period.
