

# CA Identity Suite 14.x: CA Identity Governance – Import and Clean Up Configuration Data 200

---

## PRODUCT RELEASES

CA Identity Suite 14.0

---

## COURSE TYPE, LENGTH & CODE

- Dynamic Labs  
Six and a half (6.5) Hours
- Course Code: 04IMG20499

---

## PREREQUISITES

- Basic knowledge of CA Identity Governance

## Course Overview

With today's highly distributed and evolving organizational structures, organizations require business-wide processes to review and approve entitlements, and maintain accurate roles. Unfortunately, the compliance framework incorporating review and approval of access rights and policies is often manual, labor-intensive, and inefficient, making adherence to segregation of duties and other compliance policies arduous. Organizations need a solution like CA Identity Governance that automates identity and access governance processes and provides continuous identity controls.

In this course, you will discover how to import and export configuration data in CA Identity Governance and establish a clean set of user entitlement data to support role discovery and modelling activities.

---

## What You Will Learn

- Identify the key features and benefits of CA Identity Governance.
- Import and export configuration data between CA Identity Governance and native systems.
- Clean up and enrich the configuration data for role discovery and modeling.

**RECOMMENDED NEXT COURSES**

- See the CA Education Learning Path for CA Identity Suite

**WHO SHOULD ATTEND**

- System Administrator
- Security Administrator
- Application Administrator
- IT Security Analyst
- IT Security Auditor
- IT Architect
- Technical Support Analyst
- Partner
