Course Overview

With today's highly distributed and evolving organizational structures, organizations require business-wide processes to review and approve entitlements, and maintain accurate roles. Unfortunately, the compliance framework incorporating review and approval of access rights and policies is often manual, labor-intensive, and inefficient, making adherence to segregation of duties and other compliance policies arduous. Organizations need a solution like CA Identity Governance that automates identity and access governance processes and provides continuous identity controls.

In this course, you will discover how to define business process rules that enable you to enforce compliance with external regulations and internal security policies.

What You Will Learn

- Establish and enforce a consistent set of business and regulatory compliance policies.
## Course Description: CA Identity Suite 14.x: CA Identity Governance – Check Policy Compliance 200

### RECOMMENDED NEXT COURSES
- See the CA Education Learning Path for CA Identity Suite

### WHO SHOULD ATTEND
- System Administrator
