Course Overview

With today’s highly distributed and evolving organizational structures, organizations require business-wide processes to review and approve entitlements, and maintain accurate roles. Unfortunately, the compliance framework incorporating review and approval of access rights and policies is often manual, labor-intensive, and inefficient, making adherence to segregation of duties and other compliance policies arduous. Organizations need a solution like CA Identity Governance that automates identity and access governance processes and provides continuous identity controls.

In this course, you will discover how to conduct your own provisioning and your team’s provisioning using the Role Management feature in CA Identity Governance.

What You Will Learn

- Control role and resource assignments for yourself and your team.
CA Identity Suite 14.x: CA Identity Governance – Manage Roles with Self-Service 200

RECOMMENDED NEXT COURSES

- See the CA Education Learning Path for CA Identity Suite
