

# CA Privileged Access Manager 3.X: Configuration Foundations 200

## Course Overview

Enterprise organizations need a Next Generation Privileged Access Management Platform – enabling them to protect and manage systems and privileged users across hybrid environments, all from a single point of control.

This course topic describes the architectural components of CA Privileged Access Manager, demonstrates the configuration of the appliance, and identifies port usage by various components to enable you to prepare your firewalls.

---

### PRODUCT RELEASE

CA Privileged Access Manager (PAM) 3.0.1 and greater

---

### COURSE TYPE, LENGTH & CODE
