

CA Privileged Access Manager 3.X: Getting Started with CA PAM Objects and Dependencies 200

Course Overview

Enterprise organizations need a Next Generation Privileged Access Management Platform – enabling them to protect and manage systems and privileged users across hybrid environments, all from a single point of control.

This course topic describes the objects you will use to create policies enabling privileged access, including users, devices, target applications and target accounts. You will build on these objects to create an access policy.

PRODUCT RELEASE

CA Privileged Access Manager (PAM) 3.0.1 and greater

COURSE TYPE, LENGTH & CODE

- Web-Based Training (WBT): One (1) Hour
- Course Code: 04PIM20440
