

CA Privileged Access Manager 3.X: Use the Transparent Logon Learn Tool 300

PRODUCT RELEASE

CA Privileged Access Manager (PAM) 3.0.1 and greater

COURSE TYPE, LENGTH & CODE

- Web-Based Training (WBT)
- Thirty minutes (0:30)
- Course Code: 04PIM30390

PREREQUISITES

- Knowledge of all core CA PAM administration functionality, including devices and target accounts.
- Some familiarity with XML.
- Attendees should have some knowledge of security, authentication systems and basic networking concepts.

Course Overview

Enterprise organizations need a Next Generation Privileged Access Management Platform – enabling them to protect and manage systems and privileged users across hybrid environments, all from a single point of control.

This course topic describes how to use the Transparent Logon Learn Tool to create the transparent logon configuration files that automate your user's logons to RDP Applications (RemoteApps).

In this course, you will launch an RDP access method in learn mode. You will use the Learn Tool and Control Viewer to capture the fields of a SQL Server 2012 login form to create the XML configuration file. You will then test the configuration using the built-in debug tool.

This course does not include configuring a CA PAM RDP Application with Transparent Logon. See the course topic *Control Access to RDP Published Applications* for that information.

What You Will Learn

- How to launch RDP Application Learn Mode
- How to use the Learn Tool and Control Viewer to capture specific fields of a RemoteApp logon form and build an XML configuration file
- How to test a configuration file using the debug tool

For Managers

CA Privileged Access Management will enable your team to properly manage users and entitlements, control IT systems, and conform to government regulations, which helps you to reduce costs, raise productivity, and increase user satisfaction.

WHO SHOULD ATTEND

- System Administrator
- Security Administrator
- Application Administrator
- IT Security Analyst
- IT Security Auditor
- IT Architect
- Technical Support Analyst
- Partner
- Sales
