

# CA Single Sign-On r12.8: New Features 200

## SUPPORTED PRODUCT RELEASE(S)

CA Single Sign-On  
Release 12.8

## COURSE TYPE, LENGTH & CODE

- Web Based Training (WBT)
- Forty-five minutes (0:45)
- 04SSO20240

## Course Overview

CA Single Sign-On (SSO) provides a centralized security management foundation that enables secure use of the Web to deliver applications and data to customers, partners, and employees.

This course provides details about the new and improved features in release 12.8.

A large part of this release is focused on OpenID Connect. Eleven new or expanded features are included, as well as Amazon Alexa skill integration. Several other significant enhancements are also explained, including configuration tasks and troubleshooting tips. These topics are frequently implemented to extend the SSO environment, further enhance security, and improve performance.

## This Course Will Show You How To:

- Implement eleven new OpenID Connect features
- Integrate with Amazon Alexa skills
- Use the JSON Web Token authentication scheme
- Use Web Services with JSON
- Add IP whitelisting to authentication schemes
- Understand the expanded XPS Sweeper functionality
- Review the extended platform support and library updates
