

CA Single Sign-On: Advanced Topics 300: Enhance Security with Session Linking

Course Overview

CA Single Sign-On (SSO) provides a centralized security management foundation that enables secure use of the Web to deliver applications and data to customers, partners, and employees. This series of advanced topics are frequently implemented to extend the SSO environment, further enhance security, and improve performance.

One big challenge when externalizing and centralizing security services is the last mile security of the application. Session linking helps prevent session hijacking; the re-use of a certificate or application cookie by an unauthorized party. This course topic includes both the certificate and third-party application session linking capabilities of CA SSO.

PRODUCT RELEASE

CA SSO 12.7 and greater

COURSE TYPE, LENGTH & CODE

- Dynamic labs
- One hour (1:00)
- 04SSO3008S

PREREQUISITES

- 04SSO2017S or 04SSO20171
CA Single Sign-On 12.7.X:
Foundations 200 or
equivalent knowledge.
- General: Windows server, user
directory, and database
general knowledge.

WHO SHOULD ATTEND

- CA SSO Administrator
- IT Architect
- Partner (services delivery and
presales)
- Technical support analyst
- Security specialists
