

CA Single Sign-On: Advanced Topics 300: Federate with Microsoft Office 365

Course Overview

CA Single Sign-On (SSO) provides a centralized security management foundation that enables secure use of the Web to deliver applications and data to customers, partners, and employees. This series of advanced topics are frequently implemented to extend the SSO environment, further enhance security, and improve performance.

This course topic demonstrates how to extend your CA SSO environment to enable single sign-on to Microsoft Office 365. Use the credentials and logon methods your users are familiar with to authenticate to Office 365.
