

CA Single Sign-On: Advanced Topics 300: Use CA Single Sign-On as an OpenID Connect Provider

Course Overview

CA Single Sign-On as an OpenID Connect provider allows clients to obtain the information of users authenticated by the authorization server. To configure CA Single Sign-On as the OpenID Connect Provider, you need to review that the prerequisites are met, create an authorization provider, and create a client.

This course gives you an insight on the steps involved in creating an authorization provider and a client and includes a recorded demonstration of the process.
