

CA Single Sign-On: Advanced Topics 300: Configure the Authentication and Authorization Web Services

Course Overview

CA Single Sign-On includes web services for authentication and authorization. These services, part of the CA Access Gateway installation, extend the security of CA SSO to free-standing applications.

To configure the authentication and authorization web services, create an ACO, protect the web services, and configure the web services logs.

This course demonstrates the configuration process, includes a recorded demonstration, and allows you to practice the implementation in our dynamic lab environment.

PRODUCT RELEASE

CA SSO 12.7 and greater

COURSE TYPE, LENGTH & CODE

- Dynamic Labs
- One hour fifteen minutes (1:15)
- 04SSO3012S

PREREQUISITES
