

# CA ACF2 for z/OS Version 16.x: Intermediate Administration 300

## SUPPORTED PRODUCT RELEASE

CA ACF2 for z/OS Version 16.x

## COURSE TYPE, LENGTH & CODE

- WBT

### Code and Length

- 06ACF30250: 45 minutes
- 06ACF30260: 1 hour
- 06ACF30290: 1 hour 15 minutes

## PREREQUISITES

- Basic understanding of Information Technology concepts and terminology
- Basic TSO/ISPF operational experience
- CA ACF2 for z/OS Version 16.x: Fundamentals 200 06ACF20100

## WHO SHOULD ATTEND

- Security Administrators
- System Administrators
- Information Assurance Staff
- IT Auditors
- Data Owners

## Course Overview

CA ACF2™ for z/OS (CA ACF2) provides innovative and comprehensive security for various business transaction environments that enable you to fully realize the reliability, scalability, and cost-effectiveness of the mainframe.

This course introduces additional features of CA ACF2 that provide default protection for your mainframe operating systems.

During the course, the material covered will be reinforced through case studies and demonstrations.

## This Course Will Show You How To:

- Leverage profile records to retain additional information about users and z/OS resources
- Apply cross-reference records to organize diversely named resources, users, and sources into application-oriented group entities
- Secure FTP with USS controls, certificates, and keyrings

## Course Agenda

### 06ACF30250: Leverage Profile Records
