

OnDemand CA Endeavor® Software Change Manager: Create Processor Groups 200

SUPPORTED PRODUCT RELEASE(S)

CA Endeavor® Software Change Manager
Version 18 or greater

COURSE TYPE, LENGTH & CODE

- Web-based Training (WBT) with simulations
- 1.5 Hours
- 06END20170

PREREQUISITES

- Thorough understanding of the application life cycle of your organization
- Familiarity with z/OS JCL and utilities, and TSO/ISPF
- 06END10160: CA Endeavor Software Change Manager: Overview 100
- 06END10170: CA Endeavor Software Change Manager: Introduction 100

WHO SHOULD ATTEND

- System Administrator
- Change Administrator

Course Overview

Software deployment involves many steps and stages and can be slow and prone to errors when these steps are performed manually. CA Endeavor® Software Change Manager (CA Endeavor SCM) is an integrated set of management tools that can be used to automate, control, and monitor the mainframe software development lifecycle. With the ability to support unique development lifecycles, CA Endeavor SCM provides automated and comprehensive change and configuration management.

In this course, you will examine how CA Endeavor SCM manages the software change process by creating the processor groups to be used. By attending this course, you can gain the knowledge and skills needed to help your organization successfully plan and implement processor groups for use within CA Endeavor.

This Web-based course presents a portion of the same material as the 06END20261 Instructor-led course and is one Web-based course in the CA Endeavor® Software Change Manager: Administrators bundle.

This Course Will Show You How To:

- Create processor groups
- Optimize symbols and processor flexibility

Course Agenda

Module 1: Create Processor Groups

- Overview of a Processor Group
- Scenarios

Module 2: Describe Symbols and Processor Flexibility

- Processor Features
- Processor Keywords
- CA Endeavor SCM Symbols
- Symbol Sub-stringing Functions
