

OnDemand CA Endeavor® Software Change Manager: Using the Eclipse User Interface 200

SUPPORTED PRODUCT RELEASE(S)

CA Endeavor® Software Change Manager
Version 18.0

COURSE TYPE, LENGTH & CODE

- Web-based Training (WBT) with Simulations
- 45 Minutes
- 06END20310

PREREQUISITES

- Thorough understanding of the application life cycle of your organization
- 06END10160: CA Endeavor Software Change Manager: Overview 100
- 06END10170: CA Endeavor Software Change Manager: Introduction 100

WHO SHOULD ATTEND

- Application Developer
- QA Engineer
- Development Manager
- QA Manager
- Product Manager
- Program Manager
- Change Administrator

Course Overview

Software deployment involves many steps and stages and can be slow and prone to errors when these steps are performed manually. CA Endeavor® Software Change Manager (CA Endeavor SCM) is an integrated set of management tools that can be used to automate, control, and monitor the mainframe software development lifecycle. With the ability to support unique development lifecycles, CA Endeavor SCM provides automated and comprehensive change and configuration management.

Now, via the CA Endeavor SCM Eclipse Plug-in, you can adopt an easy-to-use, enterprise-grade IDE that supports new and experienced mainframe developers. Built on Eclipse open-source technology, it is designed to simplify and optimize the use of CA Endeavor SCM.

In this course, you will examine how CA Endeavor SCM may be accessed via the Eclipse-based GUI interface. By attending this course, you can gain the knowledge and skills needed to utilize the Eclipse-based User Interface (UI) to complete many of your daily CA Endeavor SCM tasks.

This Course Will Show You How To:

- Navigate the Eclipse Integrated Development Environment (IDE)
- Work with CA Endeavor® SCM via the Eclipse-based User Interface (UI)

Course Agenda

Module 1: Navigating in Eclipse

- Perspectives vs. Views
- Descriptions of Available Views
- Local File Management
- Using the Right-click Menus

Module 2: User Setup

- Defining a Repository
- Defining a Project
- Updating a Project

Module 3: Working with Elements

- Working with Elements
- Element Status
- Merge Capability

Module 4: Working with Packages

- Creating a Package
- Viewing a Package
- Adding Element Actions to a Package
- Approve or Deny a Package
- Cast, Execute, and Ship a Package
- View and Edit SCL
