Course Overview

To be successful, IT services and infrastructures need to be optimized, so that customer satisfaction does not suffer. By employing CA Application Performance Management (CA APM), you can help ensure the quality of service and quality of experience for your critical business applications to protect revenue opportunities, end-user productivity, and customer satisfaction.

In this course, you will be provided with an overview of CA APM Team Center to understand the different views that you can use to easily triage application problems.

This Course Will Show You How To:

- Describe Team Center views and navigation
- Describe access to universes in Enterprise Team Center
