SUPPORTED PRODUCT RELEASE(S)

CA Application Performance Management 10.7

COURSE TYPE, LENGTH, & CODE

- Web-Based Training (WBT)
- 1.5 hours
- 20APF20650

Course Overview

To be successful, IT services and infrastructures need to be optimized, so that customer satisfaction does not suffer. By employing CA Application Performance Management (CA APM), you can help ensure the quality of service and quality of experience for your critical business applications to protect revenue opportunities, end-user productivity, and customer satisfaction.

Management Modules contain various elements, such as alerts, actions, metric groupings, and dashboards. These modules enable the graphical presentation of metric information and actions that you configure. In this course, you will learn how to use Management Modules to manage and organize metric data for monitoring and alert notifications.

This Course Will Show You How To:

- Organize monitoring configuration using Management Modules
- Create metric groupings
- Create alerts and actions
