

# OnDemand CA APM 10.x Describe Command Center 200

## SUPPORTED PRODUCT RELEASE(S)

CA Application Performance Management 10.7

## COURSE TYPE, LENGTH & CODE

- Web-Based Training (WBT)
- .5 hours
- 20APF20910

## PREREQUISITES

- General familiarity with Java application servers

## WHO SHOULD ATTEND

- IT Services Manager
- Any IT staff who needs to administer CA APM

## Course Overview

CA Application Performance Management (CA APM) enables organizations to measure the business value of each user's experience, proactively identify problems based on impact, and help resolve problems across today's highly complex application environments before they affect users.

You need to understand the administrative functions of CA APM to successfully administer the product and gain more control of your business services.

CA APM Command Center (ACC) provides an overview of CA APM agents in your environment that are managed by the Command Center through an Agent Controller. This course provides students with fundamental concepts on CA APM Command Center (ACC) and how to manage users in ACC. Course instruction is web-based and self-paced and includes hands-on exercises in a simulated APM environment designed to give students the experience of using the product in realistic scenarios.

## This Course Will Show You How To:

- Describe the APM Command Center Architecture
- Add an APM Command Center User
