

# OnDemand CA APM 10.x Manage Team Center Attributes 200

## SUPPORTED PRODUCT RELEASE(S)

CA Application Performance Management 10.7

## COURSE TYPE, LENGTH & CODE

- Web-Based Training (WBT)
- 1 hour
- 20APF21020

## PREREQUISITES

- General familiarity with Java application servers

## WHO SHOULD ATTEND

- IT Services Manager
- Any IT staff who needs to administer CA APM

## Course Overview

CA Application Performance Management (CA APM) enables organizations to measure the business value of each user's experience, proactively identify problems based on impact, and help resolve problems across today's highly complex application environments before they affect users.

You need to understand the administrative functions of CA APM to successfully administer the product and gain more control of your business services.

This course provides students with fundamental concepts on CA APM Team Center attributes. Attributes make it easier to differentiate components and identify their relationships which allows you to view the map from different perspectives and filter out and highlight components. Course instruction is web-based and self-paced and includes hands-on exercises in a simulated APM environment designed to give students the experience of using the product in realistic scenarios.

## This Course Will Show You How To:

- Manually set custom attribute values
- Set attribute values using rules
- Manage custom attributes with the APM REST API
