

CA PPM 15.3: Agile Central Integration 200

Course Overview

Integrating CA PPM to an agile management application is a growing need throughout the PPM community. The goal is simple: To gain a unified perspective on resources, projects and budgets.

Being able to see data from all portfolio projects in CA PPM will:

- Unify portfolio decisions in a hybrid world
- Bring financial accountability to the Agile projects
- Gain visibility into all business deliverables to show the value delivered by the agile teams
- Unify project status reporting

This course shows how CA PPM and CA Agile Central work together to enable business agility and provide complete visibility across the entire organization.

PRODUCT RELEASE

CA PPM 15.3 and CA Agile Central

*There is no major functional impact to the CA PPM 15.1 version of this course from new features in CA PPM 15.2 and CA PPM 15.3. To see the details of impact, please refer to the **CA PPM 15.3: Cumulative Differences 200** course, which is bundled with the 15.1 version of the course.*
